DETAILED ACTION

1. The Office acknowledges the changes made to the Drawings by applicant. All previous objections to the Drawings have been withdrawn.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joe Muncy on January 20, 2005.

3. The application has been amended as follows:
 - a. In the substitute specification submitted on May 25, 2005, please **delete the last line of paragraph 8.**

Allowable Subject Matter

4. The following is an examiner's statement of reasons for allowance: The prior art of record neither describes nor suggests a power line warning light apparatus wherein a charging circuit is included for storing voltage generated by a coil and generates a periodic trigger signal and the charging circuit comprises an increasing voltage transformer, a diode, a first capacitor, resistor, second capacitor, high voltage transformer, neon lamp, silicon controlled rectifier, and a flash lamp. Further, the prior

art fails to show these components connected in a fashion as described by the independent claims. These along with further limitations set forth by the claims render the application allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
